

1st CYCLE **Eau secours des Eauvillois**

Production of Drinking Water

Duration 2h30 at C.I.EAU 2h00 in mobile

Cost \$294 at C.I.EAU \$368 in mobile

Distribution of Drinking Water

Duration 2 hours

Cost \$246 at C.I.EAU

Production and Distribution of Drinking Water

Duration 5 hours 30 minutes

Cost \$417 at C.I.EAU

The activity is specifically designed for learning about the production and distribution of drinking water

Students discover, by experimenting in our laboratory, how to transform raw water into clear water, and then create a network for distributing and collecting wastewater.

1^{er} CYCLE **Eau Cube**

Durée 1 hour

Coût \$213 online

Drinking Water or Wastewater Education Module *Dive into the Online Water Station Experience!*

The Eau Cube experience includes illustrations of treatment processes, videos taken at water stations, and clips about C.I.EAU artifacts related to water treatment. It's a unique way to raise awareness among participants about water conservation and protection.

Drinking Water or Wastewater Education Module

ALL CYCLES **Eau Cube Technique**

Durée 1 hour

Cost \$236 in presential

Eau Cube Technique is available as an interactive conference in a presentation room. An integrated quiz game makes the activity interactive while students explore the expertise behind the complex processes involved in potable water production or wastewater treatment.

Option to invite a specialist technologist for an additional \$50.

Travel expenses are extra
